

Planting Instructions

Tools needed: Vertical Planter, potting mix and selection of plants

Step 1: Lay planter flat and plug plants into cells with desired design. *Note: you may need to fill cells with potting mix first for smaller plants*

Step 2: Continue planting until you've achieved your desired look

Step 3: Once plants are packed in, fill excess air pockets or empty cells with potting mix

Step 4: Even if each cell doesn't contain a plant, it must be completely filled with potting mix

Step 5: Water thoroughly (see watering instructions) and tilt panel on a 45 degree angle for 3-4 days

** Add fertilizer per plant specifications.*

Begin with a fully planted Vertical Planter

Tools needed: fully planted Vertical Planter, mounting bracket, drill, screws and level

Blank wall for your Vertical Planter

Step 1: Mark holes for the mounting bracket, making sure to keep bracket level

Step 2: Screw in proper screws, making sure to keep bracket level

Step 3: Double check level

Step 4: Carefully rest Vertical Planter on bracket, making sure it's secure

Step 5: Check to make sure Vertical Planter is both secure and level

Step 6: Add another bracket to create a Living Wall

Step 7: Follow steps 1 – 5 until Living Wall is complete and secure

Congratulations!
You now have your very own living wall.

The possibilities are endless!

Irrigator Instructions

Bright Green Irrigator™

Step 1: Center the Irrigator to fit into top watering chamber of the Vertical Planter

Step 2: Make sure the irrigator's tabs slide into the chamber so that the irrigator is snug

Step 3: Push the irrigator in all the way

Step 4: Open the lid. You will notice drip holes at the bottom of the irrigator for water to drip into the watering chamber

Step 5: Fill all the way to the top as needed
